PROFILE

Hey, I'm Pratik. An engineer by trade and a curious builder at heart. I enjoy connecting the dots between design, engineering, and the people who use what we create.

My experience spans remittance and banking systems, along with claims processing. At Inficare Pvt. Ltd., I worked with C#, ASP.NET Framework, SQL Server, IIS, and Azure DevOps on fintech applications. At Smart Data Solutions, I primarily use Java and SQL to convert paper claims into electronic data interchange (EDI) files and support claims-processing workflows.

TECHNICAL EXPERTISE

Frontend engineering
React / Next.js / TypeScript / Tailwind CSS

Backend & architecture
C# / ASP.NET Framework / SQL Server / Java / SQL / ASP.NET Core / Node.js / PostgreSQL / REST APIs

Cloud & DevOps
IIS / Azure DevOps / GitHub Actions / AWS / Docker / CI/CD / Terraform

Beyond the stack
System design / UI/UX / Agile / AI integration

EXPERIENCE

Software Engineer | Smart Data Solutions

December 2025 - Present

Developing and maintaining claims-processing systems primarily using Java and SQL, with a focus on converting paper claims into electronic data interchange (EDI) files and supporting the processes within the claims workflow.

Java / SQL / Claims processing / Paper-to-EDI conversion / Workflow processing

Software Engineer | Inficare Pvt. Ltd.

June 2024 - December 2025

Worked on fintech systems, particularly remittance and banking applications, using C#, ASP.NET Framework, and SQL Server. Worked with IIS server hosting and Azure DevOps as part of application delivery and maintenance.

C# / ASP.NET Framework / SQL Server / IIS / Azure DevOps / Remittance / Banking systems

EDUCATION

Computer Engineering

IOE Purwanchal Campus

Dharan, Nepal | 2020-2024

SELECTED PROJECTS

Remittance System | 2024-2025

Software Engineer at Inficare Pvt. Ltd.

Professional contributions to remittance and banking systems at Inficare Pvt. Ltd., using C# and ASP.NET Framework.

C# / ASP.NET Framework / SQL Server / IIS / Azure DevOps

Claims Processing Workflow | 2025-Present

Software Engineer at Smart Data Solutions

Claims-processing work at Smart Data Solutions, using Java and SQL to support paper-to-EDI conversion and related workflows.

Java / SQL / EDI / Claims processing

TeaShopPOS | Personal project

Full-stack development

A tea-shop point-of-sale system for table orders, billing, loyalty, and day-to-day operations, with automated GitHub Actions CI/CD pipelines. Demo available upon request.

C# / ASP.NET Core MVC / Entity Framework Core / PostgreSQL / SignalR / GitHub Actions / CI/CD

StreamX | Personal project

Full-stack development

A real-time messaging application with direct and group chats, live presence, typing indicators, and read receipts, with automated GitHub Actions CI/CD pipelines. Demo available upon request.

C# / ASP.NET Core / SignalR / PostgreSQL / Entity Framework Core / JWT / GitHub Actions / CI/CD
